

Child and Adolescent Clinical Psychology Post-Doctoral Fellowship: Flexible Opportunities (Assessment, Outpatient Therapy and/or Inpatient Acute Care Therapy) within Full Continuum of Care

MiraCare Group aspires to be a premier provider of comprehensive, multi-interventional, and competent mental health treatment for individuals and families. Our mission is to increase our patient's ability to accomplish a sense of security, optimism, self-value, and social connectivity as they process life's challenges and opportunities.

At MiraCare, we believe strongly in working with patients and their families to provide the support they need. We believe in supporting our patients and their families throughout the entirety of the continuum of care, recognizing this is just part of its comprehensive behavioral healthcare treatment. Through targeted programming, MiraCare helps empower children and adolescents on their journey to a healthier life. We understand we are one part of this constantly changing journey.

MiraCare is committed to providing comprehensive training and believes this post-doctoral fellowship is an integral part of our practice. By encouraging an individualized training experience to develop niches, we strive to develop psychologists who will completely, competently, and compassionately provide psychotherapeutic services as part of the MiraCare team.

The ideal applicant is team oriented, enthusiastic, flexible, interested in learning, and passionate about our field. The start date will be as soon as possible or August 7, 2023, unless otherwise decided between the applicant, practice owner, and training directors.

For more information on who MiraCare is and how we are helping children, adolescents, and their families, visit us at miracaregroup.com.

Direct Clinical Experiences

We offer multiple direct clinical experiences. Candidates are encouraged to consider one or two experiences of interest to discuss during the interview process; no decisions need to be made prior to application, and we would like applicants' cover letters to indicate preferences. Decisions about direct clinical experiences will be made collaboratively with the applicants, Training Director(s), and the Practice Owner prior to acceptance of the position.

The direct clinical experiences include:

- ***Outpatient Therapies.*** In our private practice locations, post-doctoral fellows can work with children, adolescents, and adults (as agreed upon). Individual and/or couples and family sessions are offered at the practice and can be supported by supervision.
 - Experience and exposure to Psychoneurotherapy (PNT) treatment is optional.
- ***Acute Care and Partial Hospitalization Program.*** As a key advocate for children and adolescents, these post-doctoral fellows will collaborate across the continuum of care within the MiraCare system as well as external resources,

providers, etc. Within the system, they will design and facilitate group therapies and conduct family and individual sessions with our inpatient population.

- **Psychological & Neuropsychological Testing.** Post-doctoral fellows will complete full and partial batteries. The practice offers testing services that can emphasize neuropsychological testing, emotional/social/personality patterns, as well as diagnostic clarification and treatment planning. Specialty areas (e.g., ASD, ADHD) can also be developed as cases can be assigned based on a candidate interest.

All Post-Doctoral positions include:

- Provide psychological services for a diverse group of patients in age (5 years thru adulthood) and presenting concerns, including anxiety, depression, trauma-related responses, ADHD, academic and behavioral difficulties, Autism Spectrum Disorders, and other social and emotional concerns
- Depending on the goals of the candidate, continue developing a generalist base or begin to develop a targeted service niche in the field
- Partner across a multi-disciplinary team to provide comprehensive psychological treatment
- Face-to-face individual supervision with a licensed clinical psychologist
- Group supervision of therapy cases with licensed clinical psychologists
- Professional development group with other post-doctoral fellows and newly licensed professionals focused on professional development, EPPP resources, becoming a supervisor, case issues, etc.
- Other supervision and mentoring as needed
- Provide secondary supervision to doctoral interns
- As an APA-approved Continuing Education site, opportunities for trainings both on- and off-site

Compensation

Stipend-based compensation while building patient load with the option to go to production-based compensation structure. Salary beginning at \$55,000 with the option for production-based bonuses.

Additional benefits include PTO, medical, dental, vision, 401K, short-term disability, long-term disability, and life insurance.

Application Process

To apply for a position, please submit a CV, cover letter, and two letters of recommendation from your internship program. If you are interested in psychological testing, please submit a de-identified psychological report. Please use APPA CAS and/or send materials to Caitlin Varjavand at cvarjavand@miracaregroup.com.

We encourage any and all questions about position options be directed to Dr. Jessica Mikulecky at jmikulecky.psyd@miracaregroup.com.
